

## Certificate

**Pushpa Koirala**

has successfully completed the online course Basics of Sustainable Development. The scope of the course is one credit (ECTS), equivalent to 27 hours of study. The content of the course deals with sustainable development from the identification of current events in everyday life, basic ideas and concepts to the UN goals. From the goals, the course continues to business opportunities and reporting examples, which are finally summarized to demonstrate the accumulated knowledge in the form of a creatively composed picture.

The unique verification code: ZUTTPmWmMd

Congratulations from the course teachers:

Mari Hakkarainen

Senior lecturer, Jyväskylä University of Applied Sciences, Future Factory

Eetu Lehtonen

Senior lecturer, Jyväskylä University of Applied Sciences, Future Factory

The Basics of Sustainable Development course is the first part of Jamk's Future Factory curriculum, where these lessons are applied to practical work in the other phases of the curriculum.
